EXPERIENCE

Technical Analyst - Data Migrations April, 2025 - Present

First Due - Sacramento, CA

- Partner directly with Fire & EMS agencies to understand legacy RMS systems, operational workflows, and business requirements, translating customer needs into technical requirements and tailored First Due implementation solutions.
- Serve as a technical resource for customer implementations, troubleshooting data and workflow challenges while explaining platform capabilities, implementation requirements, and potential solutions to customer stakeholders.
- Identify gaps between agency requirements and platform capabilities, collaborating with internal teams to address technical limitations, improve workflows, and support customer adoption and go-live readiness.
- Manage a rolling backlog of approximately 90 active customer implementation tickets, resolving an average of 46 tickets monthly while triaging approximately 55 new requests based on customer impact and deployment priorities.
- Transform and integrate customer data from legacy RMS platforms into First Due using PostgreSQL and Python, ensuring data accuracy and reliable production deployments.
- Standardized and refactored 19+ SQL migration scripts and optimized data-loading processes to improve implementation consistency and maintain database load times below 30 seconds.

Data Quality Engineer September, 2024 - December, 2024

Blue Shield of California - Sacramento, CA

- Utilized Informatica and Snowflake as part of ETL cycle for E2E projects, tests, and extracts
- Developed, executed, and approved 12 test extracts across 3 different projects on time with a 100% pass/fail rate
- Managed and oversaw over 150 data test issues within Jira for 4 different third-party vendors ensuring compliance with project deadlines

Data Analyst February, 2024 - September, 2024

Murphy's Magic Supplies - Sacramento, CA

- Built ETL workflows using MySQL and Python to improve business reporting and establish a functional data warehouse.
- Developed 12 Power BI dashboards providing Sales and Procurement teams with actionable performance and forecasting insights.
- Implemented quality-control processes that reduced data errors from 5% to 1.5%.
- Implemented and tested API calls using JSON and TypeScript, working with API documentation to support system integration and data exchange.

CRM Manager March, 2023 - February, 2024

Digital Tank Marketing Agency - Sacramento, CA

- Provided technical support for 100+ customer locations using an internally developed CRM platform, troubleshooting issues and supporting day-to-day operations.
- Led a team of 3 IT support staff while implementing Agile processes to improve issue management and technical support workflows.
